#### **UNDERGRADUATE TRANSFER WITH CENTRAL PLACEMENT EXAMINATION SCORE (ADD. ARTICLE – 1)**

This type of undergraduate transfer is based on the score of the examination year that the student takes and is assessed according to this.

The student including preparatory year could apply for undergraduate transfer if his/her central placement examination score of the related academic year when s/he registered to his/her university is equal to and/ or higher than the base score of the desired associate/undergraduate degree programs of our university in the relevant academic year..

If the number of applications are more than the contingency, undergraduate transfer requests will be admitted ranking from the highest ÖSYM/YKS score to the lowest scores that the contingency allows.

Current students of Yaşar University placed with Central Placement Score and actively registered could apply to the programs that their scores are equal and or higher than the base point of the relevant year which has contingency. It is required that the student's Central Placement Score that s/he obtained in the year of registration should be equal or higher than the base point of the program for which he/she applies for undergraduate transfer.

Students who enrolled to undergraduate programs with Vertical Transfer Examination (DGS) scores could apply to undergraduate transfer upon the condition of obtaining sufficient score and the availability of the contingency for the departments that they could apply according to the related year's Vertical Transfer Examination (DGS) guideline's "Undergraduate programs to be transferred in accordance with the completed associate degree programs". In reference to the decision of Council of Higher Education Executive Committee on 30.10.2018, if the candidate is placed in first placement, the first placement base score or if the candidate is placed within additional placement, additional base score should be used while applications.

Students could benefit only once from this type of undergraduate transfer.
